

Service bulletin:

DO NOT DIP YOUR NEOTAT MACHINE

Maintenance is important to the life of your NeoTat, that is why we suggest disassembling the machine and cleaning and re lubing the glide and spring with Super Lube.

Dipping the machine or flooding the machine to clean and disinfect is not recommended and will do damage to the motor inside. Signs of corrosion from this manner of cleaning will void the warranty.

Motor replacement is necessary in order to restore the machine.

Pictures show corrosion on the inside of the motor.
